RELY ON RUUD.™

A Greater Degree of Good

At RUUD, we're committed to doing good by our customers, our partners, our employees- and our planet

Here are our bold commitments towards Sustainability.

Degrees of Innovation

Our 2025 goal: Launch a line of heating, cooling and water heating products that boast a 50% reduction in greenhouse gas footprint.

Degrees of Efficiency

Our 2025 goal: Reduce greenhouse gas emissions by 50% and achieve zero waste to landfill in our global manufacturing operations.

Degrees of Leadership

Our 2025 goal: Rheem will train 250,000 plumbers and contractors on sustainable products or sustainable installation and recycling best practices.

RUUD UAVR-C VRF Series won the prestigious Climate Control Awards in 2020 and 2021.

More than 100 years ago, Edwin Ruud, a Norwegian mechanical engineer, came to America and developed the first successful automatic water heater. That early success marked the beginning of a tradition of innovation and value that led to the introduction of RUUD® air conditioning and water heating equipment in the 1950s. Since then, the RUUD® has grown into one of North America's largest manufacturers of quality air conditioning and water heating products for residential and light commercial use. Today, RUUD® operates manufacturing facilities employing highly trained workers and state-of-the-art equipment. Over the years, the product lines have expanded, changed, and improved significantly as new design techniques and better manufacturing technologies have become available. What remains unchanged throughout our history, however, is our commitment to producing the most reliable, long-lasting, efficient equipment you can buy.
